

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

LISTING OF CLAIMS:

Claim 1. (canceled).

Claim 2. (currently amended): A photocatalytic powder comprising titanium dioxide fine particles comprising an anionically active substance, wherein the fine particles have an electrokinetic potential of from about -100 mV to -10 mV in an aqueous environment at pH 5, and wherein the crystal form of the titanium dioxide fine particles ~~comprises~~ is brookite.

Claim 3. (previously presented): The photocatalytic powder according to claim 2, wherein the fine particles have a primary particle size of about 0.001 to about 0.1 μm .

Claim 4 (canceled).

Claim 5. (currently amended): A~~The~~ photocatalytic powder ~~according to claim 2,~~ comprising titanium dioxide fine particles comprising an anionically active substance, wherein the fine particles have an electrokinetic potential of from about -100 mV to -10 mV in an aqueous environment at pH 5, and wherein the titanium dioxide fine particles ~~comprise~~ is a composite crystal-system ~~fine particle~~ of anatase and brookite.

Claim 6. (previously presented): The photocatalytic powder according to claim 2, wherein the anionically active substance is at least one substance selected from the group

consisting of condensed phosphoric acid, organic sulfonic acid, sulfuric acid and hydrofluoric acid.

Claim 7. (previously presented): An aqueous slurry comprising water and the photocatalytic powder claimed in claim 2.

Claim 8. (previously presented): An organic polymer composition comprising an organic polymer and the photocatalytic powder claimed in claim 2.

Claim 9. (original): A coating agent comprising a binder and the aqueous slurry claimed in claim 7.

Claim 10. (original): A photocatalytic functional molded article obtained by molding the organic polymer composition claimed in claim 8.

Claim 11. (previously presented): A photocatalytic functional structure comprising a structure having provided on the surface thereof the photocatalytic powder claimed in claim 2.

Claim 12. (original): A photocatalytic functional structure comprising a structure having provided on the surface thereof the coating agent claimed in claim 9.

Claim 13. (previously presented): A coating layer comprising the photocatalytic powder claimed in claim 2.

Claim 14. (original): The photocatalytic functional structure according to claim 11, wherein the structure is selected from the group consisting of paper, plastic, cloth, wood, body coating of a car, wall material, glass, billboard and road construction concrete.

Claim 15. (original): The photocatalytic functional structure according to claim 12, wherein the structure is selected from the group consisting of paper, plastic, cloth, wood, body coating of a car, wall material, glass, billboard and road construction concrete.

Claim 16. (previously presented): The photocatalytic powder according to claim 2, wherein metals are supported on the surface of the titanium dioxide fine particles.

Claim 17. (original): The photocatalytic powder according to claim 16, wherein the metal comprises at least one metal selected from the group consisting of platinum, rhodium, ruthenium, palladium, silver, copper and zinc.

Claim 18. (previously presented): The organic polymer composition according to claim 8, wherein the organic polymer is at least one polymer selected from the group consisting of polyethylene, nylon 6, nylon 66, polyvinyl chloride, polyvinylidene chloride, polyester, polypropylene, polyethylene oxide, polyethylene glycol, polyethylene terephthalate, silicon resin, polyvinylalcohol, vinyl acetal resin, polyacetate, ABS resin, epoxy resin, vinyl acetate resin, cellulose, cellulose derivatives, polyamide resin, polyurethane resin, polycarbonate resin, polystyrene resin, urea resin, fluororesin, polyvinylidene fluoride, phenol resin, celluloid, chitin, starch sheet, acrylic resin, unsaturated polyester, melamine resin, alkyd resin and rayon.

Claim 19. (original): The organic polymer composition according to claim 18, wherein the composition further comprises activated carbon and/or zeolite.
